

(BY DIRECT WIRE TO THE TIMES.)

Student Mchell arrived here today from Indianapolis, and established a full-time office. He was accompanied by a secretary, Thomas Hagerity of the Central Indiana Council on Education, who is a member of the International executive board. None of the students has been in this situation, as shown by the first suspension, but they all agreed privately that the utmost harassment is around the school, and that thousands of men would obtain the suspension order have been reported that the only college in full-hand is the People's College of the South, located in the field, which is run almost exclusively by non-union men. The charter local union at this university was expelled from the A. F. of M. in 1935.

agreement for two years. The fact which has been in progress of a miners' organization for some time may cause trouble. Patrick Dolan, president of all the unions, is as yet still claims to be in the union, but the opposition said he had deposited.

THOSE WHO SIGNED.

The agreement was signed between Ann Robbins and the miners' committee at 2:30 o'clock, the scale of work in force two years, and for an increase of 5.55 per cent. Announcement was made at the time that the scale had been by the following independent Dilworth, Crescent, Maxine

25,000 men. It is expected that numerous operators will sign the scale soon, although has done so yet. Operators who mines in more than one district sign in all the districts before signing any mine. No unusual incident of any kind was reported from the western field today.

PROOF FOUND AFTER DEATH.

Search of Biago Cilli's Shop
Clears Doubt.

Old Cobbler Leaves Half-
Made Coin on Bench.

Convicted Counterfeiter Had
Claimed Innocence.

After again declaring his innocence of a charge of counterfeiting, upon which he was sentenced to the penitentiary for eight years, Biago Cilli died the other day in his cobbler's shop at No. 1613 Byron street. Yesterday a search of the place by an officer revealed many interesting things.

Cilli was found to be a member of one of the most notorious gangs of counterfeiters ever known to the Pacific Coast, but to the very last he declared himself innocent.

A United States Secret Service agent yesterday afternoon made a trip to Cilli's shop on Byron street, now deserted through the old man's death.

UNIQUE COIN.
When the officer departed from the place he carried with him a unique coin. It is a crudely-designed 10-cent piece. Cilli had dropped it on a bench along with a quantity of tools on one of the days when he felt his fatal illness approaching. It was never removed, and never finished.

A close examination of the coin shows that the date had not yet been struck on one side, and the edge still remains untrimmed. But to the secret-service officer the discovery of the coin is more than noteworthy. It proves beyond a doubt the old man's complicity in the series of counterfeiting schemes which started the whole coast by their immensity and silence forever Cilli's plea of innocence.

SURPRISED AT WORK.
Cilli, along with John DiGiuseppe, Joe Fingiano and Michael Elango, was arrested on June 24, 1924, by Officers Moffat, Auble, Benson and Goodman. The gang was surprised while at work in a little shack near Prospect Park.

Great quantities of counterfeiting tools and various kinds of apparatus were confiscated, along with thousands of dollars' worth of spurious coin. The walls of the building were lined with currency, which the men were daily turning out, and even some years afterward a rancher, in plowing his fields, unearthed a quantity of silver dollars which had been "planted." All of the men were tried and sentenced to serve in the penitentiary. Cilli returned to this city at the expiration of his sentence, which was considerably lessened by his good behavior, and has since been occupied with his work of a cobbler on Byron street.

RUSH INDICTMENT OF MRS. LE DOUX.

AND JURY CHARGES HER WITH
McVICAR'S DEATH.

Visit Made to Prisoner by Brother
and Uncle of Murdered Man, Sen-
tation of Day in Stockton Case.
Woman's Lawyer Indignant That
Sheriff Allowed Interview.

[BY THE ASSOCIATED PRESS.—P.M.]
STOCKTON, April 2.—The grand jury today indicted Mrs. Le Doux for murder, charging her with the death of A. N. McVicar in this city March 24. Twenty-one witnesses were examined before the jury, and the matter was rushed through, the indictment being returned after office hours in this courthouse.

The session of the day was the visit made to the prisoner by J. C. McVicar, a brother of the deceased, who arrived here a few days ago from Colorado, and ex-Judge A. N. Sullivan of Portsmouth, N.H., who is an uncle of the McVicar, and who came out here to assist in the prosecution, if he is allowed to do so.

Attorney McNoble, who represents the woman, is indignant over the fact of the sheriff allowing the interview, and characterizes it as an unfair means to trap the woman into damaging admissions while facing the brother and uncle of the dead.

The woman never knew the two men who called on her today, and she talked with them fully half an hour, but it is said that she did not weaken her case in the least. She asked them to withhold their condemnation until her case was presented to a jury.

Both McVicar and Sullivan were witnesses before the grand jury today. They are the only persons who have been permitted to see the prisoner in jail save the prosecuting officers and her attorneys and mother.

FLUID BAFFLED CHEMIST.
FLUID BAFFLED CHEMIST.

[BY THE ASSOCIATED PRESS.—P.M.]
SAN FRANCISCO, April 2.—Dr. Roy Rogers, chemist of Cooper Medical College, last night made a report to Dist. Atty. Morton in connection with the death of A. N. McVicar at Stockton.

In the hotel room which had been occupied by McVicar and Emma Le Doux a bottle was found marked "cyanide of potassium." The label showed that the bottle had been purchased at the Baldwin drug store of San Francisco. A small quantity of fluid remained in the bottle. As it was presumed to be a portion of the deadly poison designated by the label, it was submitted to Dr. Rogers for examination.

Dr. Rogers reported that he found one cubic centimeter of a yellow fluid in the bottle, but that the fluid did not contain the slightest trace of cyanide of potassium or any other poison, but he could not determine what was really the nature of the fluid.

PARKER SEEKS DIVORCE.

Dentist Who Deserted Family Here
Will Be Closely Watched by Au-
thorities in New Mexico.

Information was received by the local authorities yesterday that Dr. W. A. Parker, who deserted his sick wife and two small children in this city several weeks ago to leave attention upon other women, has applied for a divorce at Silver City, N. M.

The territorial law requires that a person must be a resident of New Mexico for one year before applying for a divorce, and it is necessary that the applicant swear that he or she has been there that long before the case can be tried.

Deputy County Prosecutor Eddie T. W. W. yesterday had appointed the territorial court had appointed

an attorney to represent Mrs. Parker in the case. Eddie will communicate with the attorney appointed by the court to look out for the interests of the woman, who is destitute and unable to employ counsel, and should have taken oath that he has been in New Mexico for one year, as is necessary if he prosecutes his suit, he will immediately be arrested on a charge of perjury.

While Mrs. Parker cannot afford to fight the case the City Prosecuting Attorney will do what they can to aid her cause, as will the attorney named by the court at Silver City. It is not possible to bring the doctor's back to this State for leaving his wife and family, but if he should be caught on the more serious charge of perjury the peace officers would feel better satisfied.

It is understood Parker is seeking a divorce on the grounds that his wife deserted him, when as a matter of fact the case is exactly the reverse. Mrs. Parker is now living near Spadra with her sister.

Parker practiced dentistry in this city for a number of years, and had offices on Spring street. He lived with his wife and children at Sawtelle, where they owned a home. The police never saw him again. The police may be remained several days in this city in company with another woman and then left for New Mexico.

Mrs. Parker at that time inclined the idea that he was held prisoner by a woman of the town, and the police said at the time that this was the case, but that they could not arrest the woman without a complaint and warrant. The divorce case will be watched very closely by the local authorities, and if Parker lays himself open to arrest in any way complaint will immediately be made.

FOOL JOKE ON EDITOR WILDER.

POLICEMEN TAKE HIM AT A RIV-
ERSIDE BANQUET.

Is "Accused" of Defacing Shrubbery
Along a Public Highway—Just a
Case of Divining Rod Amusement.
Pungent Opinion is Not Expressed.
Surprise in Store for Today.

[BY DIRECT WIRE TO THE TIMES.]
RIVERSIDE, April 2.—[Exclusive Dispatch.] Consternation seized the guests of the Glenwood this evening when two stalwart policemen marched into the midst of a merry banquet and arrested R. W. Wilder, owner of Everybody's Magazine, on a charge of breaking and defacing shrubbery along a public highway. The banquet was given by Mrs. Wilder in honor of her husband's birthday, to thirty-nine guests, and the defacing shrubbery was done by the police entered the hall.

Yesterday R. W. Wilder and E. T. Thayer took up the study of water finding, and after securing some willow twigs, amused themselves and the Glenwood guests with their "divining rod." It was not so funny this evening, when Wilder was arrested and gave bond to the officers to appear before the City Recorder at 10 o'clock tomorrow morning.

He took the matter philosophically, but it was easy to see that he held a very pungent private opinion of Riverside with which he would not share his guests.

The editor and owner of Everybody's will not learn that the whole thing is an April fool joke until he surprises Recorder Potter tomorrow by his appearance.

SCARE AND HOTEL VACCINATION.
The guests of the Hotel Aldine at No. 24 South Hill street were startled yesterday by the discovery of a mild case of varioloid in that hostelry. One of the guests, a Mrs. Lee, who is said to have recently arrived in this city from New Mexico, became sick and Dr. Scroggs diagnosed the trouble. The Health Officer was immediately notified and the hotel was quarantined for three hours yesterday afternoon, but at 5 o'clock it was decided that there was no danger of smallpox infection and the quarantine was raised. The sick room has been thoroughly fumigated, and the bedclothes destroyed. As a precautionary measure every guest in the hotel was vaccinated last evening by order of the Health Department.

LITERARY MEETING.
The Literary Section of the Temple Union will be held at 8 this evening at Ninth and Hope streets. The programme will comprise a violin solo, a book review, readings, old Italian songs, and a collection of work on popular operettas. Free to the public.

SPRECKELS IS IMPROVING.
SAN DIEGO, April 2.—[Exclusive Dispatch.] Latest reports indicate that John D. Spreckels of San Francisco, who has been critically ill, is much improved. He has been able to be up and dressed and to enjoy the company of his family each day for several days.

HE MAKES THE
DEAF TO HEAR

Remarkable Scenes at the Angelus in
the Office of Mr. Geo. P. Way, In-
ventor of the Way Ear Drum.

Mr. Way has been busily engaged in examining and advising with a large number of deaf persons who have called to consult him.

No one who has not seen the patient has not been able to hear for years, and the wonderful change that comes when the patient hears the sounds of the outside world for the first time is thrilling to witness.

Mr. Way, whose home office is in the Malco Building, Detroit, Mich., does not claim to cure every case of deafness. In all cases Mr. Way tells his patients plainly just what can be done for them.

Appointments can be made by telephone, if desired.

Mr. Way will be in Los Angeles, at the Angelus, all this week, April 2 to 7 inclusive. All who are deaf should be sure to call on him, as it will cost nothing to learn whether he can help you or not.

THE LAXATIVE OF KNOWN QUALITY

There are two classes of remedies: those of known quality and which are permanently beneficial in effect, acting gently, in harmony with nature, when nature needs assistance; and another class, composed of preparations of unknown, uncertain and inferior character, acting temporarily, but injuriously, as a result of forcing the natural functions unnecessarily. One of the most exceptional of the remedies of known quality and excellence is the ever pleasant Syrup of Figs, manufactured by the California Fig Syrup Co., which represents the active principles of plants, known to act most beneficially, in a pleasant syrup, in which the wholesome Californian blue figs are used to contribute their rich, yet delicate, fruity flavor. It is the remedy of all remedies to sweeten and refresh and cleanse the system gently and naturally, and to assist one in overcoming constipation and the many ills resulting therefrom. Its active principles and quality are known to physicians generally, and the remedy has therefore met with their approval, as well as with the favor of many millions of well informed persons who know of their own personal knowledge and from actual experience that it is a most excellent laxative remedy. We do not claim that it will cure all manner of ills, but recommend it for what it really represents, a laxative remedy of known quality and excellence, containing nothing of an objectionable or injurious character.

There are two classes of purchasers: those who are informed as to the quality of what they buy and the reasons for the excellence of articles of exceptional merit, and who do not lack courage to go elsewhere when a dealer offers an imitation of any well known article; but, unfortunately, there are some people who do not know, and who allow themselves to be imposed upon. They cannot expect its beneficial effects if they do not get the genuine remedy.

To the credit of the druggists of the United States be it said that nearly all of them value their reputation for professional integrity and the good will of their customers too highly to offer imitations of the

Genuine—Syrup of Figs

manufactured by the California Fig Syrup Co., and in order to buy the genuine article and to get its beneficial effects, one has only to note, when purchasing, the full name of the Company—California Fig Syrup Co.—plainly printed on the front of every package. Price, 50c per bottle. One size only.

Tea
Garden
Drips

Buy a can of Tea Garden Drips and make some candy for the children by these two recipes. As Tea Garden Drips is a pure, sweet, wholesome syrup you are sure to have a most delicious and delicate confection. Candy from these recipes is both inexpensive and simple to make.

Tea Garden Taffy

Boil from twenty to thirty minutes the desired quantity of Tea Garden Drips. Just before taking off the steam, put in a lump of butter, about the size of a walnut for each quart of syrup. When done pour on a plate, well buttered to prevent sticking. As soon as it is cool enough to handle pull until it becomes a light cream color—then you have Tea Garden Taffy, a delicious candy.

Tea Garden Caramels

Melt a tablespoonful of butter in a saucepan, add one cup of Tea Garden Drips, two squares of cube chocolate cut into flat pieces, three tablespoonfuls of cream and the same quantity of salt. Mix until you find that the candy hardens in cold water. Let solid and stir a piece of salt into the mixture. Spread on a fat surface and when hard enough cut into squares—then you have Tea Garden Caramels, deliciously sweet and pleasing candy.

Order Tea Garden Drips (in cans easy to pour from) at your grocer.

SECOND DIVORCE
OF MRS. NEWTON

LATEST HUSBAND OF THE FIRST
MRS. EARL SUES.

Protracted Stay in Europe the Cause of the Alienation—She Went Over to Hear Parsifal and Remained Nineteen Months—First Husband Was E. T. Earl.

The former Mrs. E. T. Earl, now Mrs. I. B. Newton, is apparently about to acquire another divorce. Suit has been against her in the Superior Court with her latest husband—Mr. Newton—as plaintiff. The suit is the ground upon which the divorce is sought.

Mrs. Newton's alleged custom of extending her visits to other cities far beyond the bounds of her husband's consent, is the ground of the suit. The instance which seems to have caused the final breach was a visit to Europe, which was scheduled to last six months, and only was brought to a close at the end of nineteen months.

If there is any other cause of trouble, the divorce trial—set for next Thursday—will not likely to divulge it. It is on the occasion of the previous divorce suit, Mrs. Earl will not admit the public. It is understood that she will not be represented by Walter J. Frank.

Although Mrs. Newton came back to her husband on her return from Europe, they are now living apart. Mrs. Newton has gone to the California Hotel and continues to live in California. Neither will discuss the divorce in any way.

Mrs. Newton was a belle in Sacramento—daughter of Dr. Kuntz—when she married E. T. Earl. She lived in the Westlake district, in which the second Mrs. Earl now lives. Society was startled by her husband's abrupt departure, and his alleged cruelty.

The trial of that case was secret but sensational. Several years afterwards when people were again astonished to learn of the marriage of Mrs. Earl to I. B. Newton. It was celebrated by a large and gorgeous banquet at the Van Ness.

Very soon after their marriage, as Mrs. Newton made the first of her visits, which did not accord with the program.

Mrs. Newton went to San Francisco to see her mother, and on her way back, finding letters did not go good, Mrs. Newton finally had to send one of her friends to return. Even then her friend's task was a seemingly arduous one.

The Newtons lived in a hotel here some time, Mrs. Newton investing in the time in Europe being by Mr. Earl. She was a well-to-do woman.

Something over nineteen months ago Mrs. Newton went away on another visit, this time in Europe. Being very much against her husband, she wanted to go to Europe, and she wanted to go to Europe, and she wanted to go to Europe.

Mrs. Newton had left this daughter in the hands of her mother, and she was alone and unprotected in a foreign land, which was to have been of short duration, dribbled on and on.

She finally arrived in this country, and she began hearing of her husband's return, where she is said to have been waiting for him. She had a tip from a friend on Street.

Their friends supposed all was at once more, and the Newtons were reunited and took up their abode at the Alexandria.

Mrs. Newton has stated that he will not see his son and daughter, and that he will not see his son and daughter, and that he will not see his son and daughter.

Further word regarding the rich gold mine north of Beatty in the Bullfrog district, following the report of the wonderful new mining camp publicized in The Times last Saturday.

Los Angeles yesterday in a letter from the American Mines and Investment Company, in the San Simon Building, from C. W. Culpepper, was an enthusiastic and says in part:

"One of the biggest strikes made in the world, if not the biggest ever made in this State, was made on the Texas property located fifteen miles north of Beatty. Everyone in this district knows that the Beatty district is one of the richest in the world, and that the Beatty district is one of the richest in the world, and that the Beatty district is one of the richest in the world."

The "pump" was being pumped by the representative of the national Brotherhood of the Beatty district, and the Beatty district is one of the richest in the world.

Technical Expert
The April 1934 special life insurance following death of the insured, the amount of the bonus was \$10,000.00. The bonus was \$10,000.00. The bonus was \$10,000.00.

TUESDAY, APRIL 3, 1906.

SECOND DIVORCE OF MRS. NEWTON

LATEST HUSBAND OF THE FIRST
MRS. EARL SUES.

Protracted stay in Europe the cause of the Alienation—She Went Over to Hear Parafal and Returned Nineteen Months—First Husband Was E. T. Earl.

The former Mrs. E. T. Earl, now Mrs. I. B. Newton, is apparently about to acquire another divorce. She has begun her suit against her husband in the Superior Court with her latest husband—Mr. Newton—as plaintiff. Defendant is the ground upon which the divorce is sought.

PROSPEROUS UNION LEAGUE.

Limit of Membership Reached, and
Finances in Good Condition—Three
Directors Re-elected.

The annual meeting of the Union League was held last night, when the reports of officers were heard and the result of the election for three directors announced. R. N. Bulle, Lester L. Robinson and G. M. Giffin were re-elected without opposition.

The report of the secretary, M. S. Gregory, was gratifying to the League and he was highly complimented on his management of affairs. The growth of the organization has been very rapid since the acquisition of the new clubhouse on West Second street, less than two years ago, and the limit of membership has been reached, which is 600 active city members. Of these, 125 have been taken in during the past year, and the average number now taking luncheon daily at the club is 150.

The business for the year amounted to \$25,000 and enabled the management to pay the indebtedness of the clubhouse, which remained from sitting up the new house, and at the same time \$2000 was added in fixtures, the total value of which now is \$12,000. There is now a debt of but \$2000 and had not the additional fixtures been added the club would not owe a dollar. The library contains 200 volumes, many of them books of great value.

PREPARE FOR CONVENTION.

Local Baptists Name Committee to
Arrange for Gathering of Negro
Brethren.

The National Baptist Promotion Committee met at the Second Baptist Church last evening and was addressed by Prof. David Abner, Jr., president of the Gaudalupe College of Seguin, Tex. He stated that 700 delegates could be expected to attend the national convention in Los Angeles in September from the Long Star State, and that the convention undoubtedly would be the largest ever held by the Negro Baptists. At the 1905 gathering the attendance was nearly 25,000.

A N EVEN BREAK WITH ATHLETES.

BIRD WILL HAVE TO MAKE
FASTER TIME.

Hall, the California Freshman, Looked to for the High Jump—Hagerman Will Find a Hard One in Snedigar—The Relay Race Belongs to Anybody.

BY DIRECT WIRE TO THE TIMES: SAN FRANCISCO, April 2.—[Exclusive Dispatch.] Judging from the showing made by the all-Southern California team against Stanford athletes last Friday morning, in which the southerners won by a narrow margin, the meet with the University of California tomorrow afternoon will be a close struggle, and it would not be surprising if Coach Holmes's men earned another victory. Bird, speedy Occidental College sprinter, had little difficulty in capturing first places against Stanford in both 100 and 220-yard dashes, but it will take even better time than he made last Friday to beat Snedigar and Stanton, who will represent California in sprints tomorrow. These two Berkeley men are running in close to record time and Bird will have to extend himself to take first or second place.

In the quarter-mile Bird should win, as California's 440-yard men are no better than Stanford men, whom he beat last Friday. The half-mile and mile also should be won by the southern team, according to their showing last week. The high jump will be a great contest, as Munger of Pomona College, has a record of 6 feet 1 inch, and he will be forced to do his very best to beat Hall, the phenomenal freshman at California, who cleared 6 feet 2 inches in the National Athletic meet last Saturday. It would not be surprising to see a new Coast record made in this event. The broad jump will also be high class, and Hagerman, the crack southern jumper, will have to do better than he did against Stanford if he beats Snedigar and Neighbor of California. In the hurdles the southern team has a slight advantage, and should take a majority of the points. The pole vault will probably go to the Berkeley men, and the relay is about an even break, with the visitors having a shade the best of it. Altogether, it looks like an extremely close and high class meet, with a good chance for the southerners to win.

MM. TINGLEY TRAVELS.

"Purple Mother" Goes to Santiago de
Cuba in the Interest of Her
Propaganda.

BY DIRECT WIRE TO THE TIMES: SAN DIEGO, April 2.—[Exclusive Dispatch.] Katherine Tingley has left for Santiago de Cuba to inspect the Raja Yoga schools and to establish others in Havana and elsewhere. She will also participate in the National Philanthropic and Educational Congress in Santiago de Cuba, beginning April 15.

The "purple woman" is accompanied by thirty people, including representatives of the Point Loma schools, and also officials of the International Brotherhood and their wives. Supporters of Mrs. Tingley assert that the Raja Yoga wave is sweeping over Cuba.

TERMS MADE PLAIN.

Technical Expressions Used by Insurance Agents Translated into Plain English.

The April World's Work which is a special life insurance number, gives the following definition of insurance words and terms which every policyholder ought to know: "Level premium is a premium which is the same at every payment; that is, which becomes no greater as the policyholder grows older."

The reserve is the excess amount charged in the early years of level premium policies to offset the failure to increase the premium during the later years. This reserve is invested by the company, and the proceeds from it make up the deficiencies in the later premium payments.

Deferred dividends are dividends that are not distributed among the policyholders annually but are held by the company and paid to the policyholders at longer periods, usually twenty years. A surrender is the act of a policy-

holder in giving up his policy for a consideration from the company. The surrender value, or cash surrender value, of a policy is the amount the company agrees to pay if the policyholder surrenders his policy. This is less than the sum that he has paid in premiums.

A non-participating policy is one that gives the holder no right to dividends. An annuity is money paid back annually to a policyholder at stated intervals after a certain date, in consideration of the money that he has paid into the company.

Installment policies, return premiums, gold bonds, and other similar arrangements are varieties of annuities in combination with life insurance.

A toning policy is one on which the holder receives nothing if he fails to keep up his premium till he dies.

Term insurance is insurance for a specified number of years. The amount for which the policyholder is insured is paid only in case he dies before the expiration of the agreed term.

Renewable term insurance is term insurance with the additional privilege of renewal of the policy at the end of the first term or succeeding term of years without further medical examination.

What She Left Off.

A teacher in a certain Episcopal Sunday-school had been impressing on her girls the need of making some personal sacrifice during Lent. Accordingly, on the first Sunday of that penitential season, which happened to be a warm spring day, she took occasion to ask each of the class, in turn, what she had given up for the sake of her religion. Everything went well, and the answers were proving highly satisfactory, until she came to the youngest member. "Well, Mary," inquired the teacher, "what have you left off for Lent?"

"Please, ma'am," stammered the child, somewhat confused, "I—I've left off my leggin's."—(Lippincott's.)

PLAYHOUSES
AND PLAYERS.

MURBANK. For the man or woman who loves genuine down-east comedy, with the heartiest interest in the list of country "types," the Murbank offering of "Old Jed Prouty" cannot fail to interest, for as a piece of its class it is almost ideally produced.

Murbank has one of the best aggregations of character actors that have ever played in stock in the South-west. This is as far as the men are concerned, but with the exception of Miss Hall, Carol Marshall, and perhaps one or two others, the feminine contingent is lamentably weak and utterly unworthy.

The males in this play are more than funny—they are hilarious. The most ridiculous is Harry Metcalf, masquerading as the old town-crier and constable. There are some parts of Metcalf's performance that are overdone, but his absurd old face, squint, high voice and quaint mannerisms—all the more laughable because of the good-looking romantic actor behind them—are a tribute to real histrionic talent. None the less, it is Harry Metcalf, seen as the farmerish Joe Stover, a Yankee tradesman, Willis Marks conveys the idea, too, as John Todd, the grasping township justice.

Of course, the foundation of the play must include John Burton, as old Jed himself. Burton has played the part before and the same tributes that are given him will apply now. It is directly in his line a queer, humorous, kindly old-man study, a bit in dialect that is peculiarly Burtonesque, and as such it is a favorable comparison to the well-remembered original of Richard Golden.

Fay Palmer, the most talented child actress in Los Angeles, captivates her auditors with the maturity of her playing, and the intelligence and life which she throws into her part, that of little Alice.

Smaller characterizations are well handled by H. J. Ginn, Harry Glasier, and William Desmond. It is this ability of good actors in the smaller parts that makes the comedy the work of art that it is.

Next week "In the Palace of the King" will be produced again at the Murbank. Blanche Hall will return to the leading part, after two weeks' rest.

HOTCHKISS. The musical comedy given at the Hotchkiss this week is Charles Horst's "A Milk White Flag," with its broad satire on the doings of the militia company of a small town.

Robert Pitkin gives an inimitable characterization of the Colonel, Christian Berriel, a retired coal merchant, who looks like Napoleon Bonaparte—and who makes strenuous efforts to live up to the resemblance. Mr. Pitkin's strutting, and mouthing, and frowning, are all very impressive—and likewise very funny.

Edward Graves does some good work in the part of Mark Tombs, leading physician of the town, and William Herman West is very convincing as Gen. Hurley Burleigh. Miss Kendall is particularly "itching" in the widow's weeds of Aurora Leach, who "either is or isn't" the contractor's wife. Miss Nichols is absurdly funny as "the orphan." Penny Lane.

The best part of the whole comedy, of course, is where the militia company gives a rehearsal of a comic opera, and where some grand opera are actually given. Lucile De Val, Coit Albertson and Frank Blair all appear in this scene, and all sing very well last night. Frank Blair gave a splendid rendition with variations of the "Toreador Song" from "Carmen." His voice and abundant good singing brought forth the hearty plaudits of an appreciative audience.

DELASCO. "When Knighthood was in Flower," which at its first presentation several months ago was acclaimed as one of the most complete scenic productions ever given in stock in Los Angeles, is being repeated for a single week, at the request of Delasco patrons.

Eugene Thais Lawton's triumph as Mary Tudor is too recent to admit of further extended comment. Galbraith's sturdy Brandon, Bernard's Dauphin and Yerrance's cholerick King Henry VIII are also prominent characterizations.

ORPHEUM. Abd el Meder, with his three wives, is not only a novelty in vaudeville performance, but is the best "stage painter" that has ever appeared here. His act is very short, but in its duration he covers a large canvas with a really beautiful landscape in colors, putting in a bird, small human figures, and a boat, with single lightning-like hand strokes, and frequently using both hands at the same time. His program, in side trousers and velvet, is some pretty little caricatures in their own way.

Of the rest, Marshall P. Wilder is still the best and the most subtle. On that account his almost Shakespearean humor sometimes cuts clear of the gallery entirely, but there are funny points in the rest for all the house.

Sandro's burlesque circus is good for the lovers of animal acts. The ponies who do the performances are in reality dogs, with clever masks and tails.

GRAND OPERAHOUSE. Elford's company has returned to the Grand Opera-house, and is presenting, this week, the familiar "New York Day by Day." The play is a typical melodrama, with all sorts of exciting situations and thrilling rescues—effected after the traditional hairbreadth escapes. The central figure is a noble minded young sailor, who saves a pretty blind girl from the pitfalls of fortune hunters, and finally succeeds in winning for her a rightful fortune.

The presentation is up to the Grand Opera-house standard, and ample for the play depicted.

MASON OPERAHOUSE. Darkness reigned over the auditorium of the Mason Opera-house last night. A heavy landslide on the Southern Pacific, putting the whole line out of business, was the cause.

The "Little Johnny Jones" company was stuck over the line, and by revised schedule should arrive this morning, thus giving plenty of time to prepare for the first presentation this evening.

OUT OF FLIMBY JAIL. E. Bamford, a Mexican confined in the East Side Police Station, broke jail last night by picking the lock of his cell and crawling through a window.

The escape was made during the absence of the sergeant in charge, and was discovered a few minutes after the latter's return. The prisoner was locked up early yesterday in charge of drunkenness. The jail is a flimsy constructed affair, and used only as a place of temporary confinement for prisoners who are transferred to the Central Police Station.

TRIES RAZOR ROUTE. Because he was disgusted with life, C. F. Walters yesterday morning, in the presence of his wife, attempted suicide by cutting his throat, with a razor. He tried to sever the jugular vein but missed it and will recover. After the cutting he carefully wiped the razor, put it back in the case, and then lay on the bed. He and his wife had just had a violent quarrel, resulting from her discovery of the fact that he had been playing the piano in a low resort. He was treated at the Receiving Hospital and taken to his home in the afternoon.

PERSONAL. C. D. Galbraith, formerly of this city, but now representing a guaranty company, with an office in San Francisco, is a guest at the Hotel Catalina, accompanied by his wife.

Half-Sick

When your nerves are weak, when you are easily tired, when you feel all run down, then is the time you need a good strong tonic—Ayer's Sarsaparilla. Your doctor will tell you why it has such power over weak nerves, why it makes the blood rich, and why it gives courage and strength. Ask him if it is the medicine you need.

LOWELL, MASS.
The Standard of all our medicines.

Robinson Company
Boston Dry Goods Store
293-297-299 SOUTH BROADWAY

27-inch Peacock Moresen is by far the best petticoat fabric we know of at the price—33c a yard. Beautiful moire effects in a splendid assortment of colors.

85c Silks 60c
19-in. Clifton Bond Taffetas

We know of no other store in America where 19-inch Clifton Bond Taffetas can be had for less than eighty-five cents.

Former ads. told how we came into possession of an enormous lot of them at a quarter under regular.

All we need say now is that you have your choice of nearly a hundred colorings in this unmatched good eighty-five-cent silk at sixty cents.

Our usual broad guarantee on every yard.

Extensively used for Petticoats and Jacket linings, as well as for street and evening costumes.

Smart Suits for Misses

This concerns the correct costuming of girls in the "difficult" ages—eight to sixteen years.

Dress for these ages should combine the simplicity and serviceability required by childhood with stylishness desired by womanhood.

Our showing of woolen and washable suits meets these requirements.

Peter Thompson suits, of linens and other washable stuffs, in 8 to 16-year sizes—at \$7.50 to \$12.00.

Peter Thompson suits, of blue serges, at \$12 to \$20; 8 to 16-year sizes.

Eton, pony jacket and box coat suits, of smart mixtures, checks and indistinct plaid suitings, beautifully trimmed, \$15 to \$40; 12 to 16-year sizes.

(Rear of Annex.)

\$2 to \$4 Embroideries

If you passed our windows yesterday you probably noticed that we are going to sell 22 to 45-inch Allovers today at 95c. Exquisite designs on Swiss and Batiste—really \$2 to \$4 values. Nothing more need be said.

Clearance of Spring Suits

Out of the question to have an Easter gown or tailored suit made to order now. Unnecessary, too, when you can take advantage of this timely reduction of ours on flared Spring styles in silk shirtwaist and tailored cloth suits whose wear-time has just begun.

These new prices bear little relation to the high quality and character of the garments concerned. Their style correctness is assured, or they wouldn't be here. And that's just the point—we don't want a single one to lag behind the fashions ever so little before it leaves us, so we put a price on them that's bound to move them quickly.

Suits at \$25

Worth \$27.50 to \$35 Each.

Shirt waist suit of rose colored panama; round yoke of fine Valenciennes lace and small tux; full top sleeves with long cuffs; silk braid trimming about cuffs and yoke; full circular skirt, topped off with tiny cluster tucks.

Eton coat suit of green paila taffeta; jacket outlined with plaided ruching and fancy silk braid trimmings; sleeves elbow length; full gored princess skirt having ruching and braid above hem, similar to that on the coat.

Outing Flannel Undergarments

For Less.

We're offering the strongest possible inducements to buy our outing flannel underwear at this time; many persons will follow the very wise plan of providing now for next winter's needs. And isn't it a satisfaction to buy underclothes where you can be sure that the quality and fit are all right, no matter how small the price?

Women's jersey knit skirts in red, navy, pink, gray and other shades, reduced from 75c to 50c.

Women's outing flannel short skirts; \$1 values now 75c; 36-in. length, reduced from 75c to 50c.

Children's extra quality skirts with scalloped edges, 45c.

White outing flannel skirts, lace trimmed, 65c; with pink or blue embroidery, reduced from \$1 to 75c.

Women's outing flannel gowns generously reduced.

We're splendidly provided with lines of black satine short skirts and bloomers for women and children.

SALE OF OUT-SIZE UNDERWEAR—These extra-size garments at reduced prices are meeting with enthusiastic reception among women who usually have difficulty in getting ready-made underwear of any price.

White Linens for Gowns.

Linens—white linens in particular—are to be a strong note in the summer fashions. Part says so, and who shall gainsay it? Extremely smart styles will suggest that you had your linen dresses made up with hand-embroidery for embellishment on waist and skirt with a bit of Irish lace—lingerie style, you know. Now as to the place where you'll purchase the linens—no such assortment is shown elsewhere in town as ours. Beginning at 50c, we've both the sheer and heavy qualities up to \$3 a yard. And nowhere else can you get the world-famous "Old Bleach" linen, that embroiders and wears so splendidly.

OME ONE Has Said:

"The less competent a dentist is the more ready is he to warrant everything for a lifetime." The thoroughly competent dentist does not warrant his fillings for ten years, but does warrant to give satisfaction to all patients.

Dr. Schiffman does more than this, he warrants not to "kill" you while having operations performed.

On account of some unfortunate experience I had in the extraction of my teeth, I became a great coward in this respect. Today Dr. Schiffman extracted one of my teeth refractory teeth without causing me one particle of pain.

D. E. TRASK, Judge of Superior Court, Los Angeles County.

I had thirteen sore teeth extracted by Dr. Schiffman. I dreaded before he began, but it didn't hurt me one bit.

A. T. ROBINSON, "Bandish Jack," Avonlea, Carolina.

I had my upper and lower teeth extracted by Dr. Schiffman without any pain. I have since had an upper and lower set made and they fit fine. They fit so tight that I can with difficulty that I can remove them. I cannot speak too highly of Dr. Schiffman and his work, and advise every one needing work done in this line to go to him.

After having six plates made all of which were made by Dr. Schiffman, I can say that they fit for the first time in my life.

Dr. Schiffman's method of fitting dentures is the best I have ever seen.

BRENTWOOD PARK

Skilled landscape architects and engineers are now engaged in transforming 360 of the acres between Sawtelle and the ocean into what may truly be called a PERFECT PARK.

John MacLaren, builder of Golden Gate Park, San Francisco, with the aid of over a half million dollars, will surely make BRENTWOOD PARK a veritable WONDERLAND.

All avenues will be laid out following the gentle contour of the land. They will range in width from 75 to 185 feet. Graceful curves and circular parkings will prevail. No lot in the Park has less frontage than 100 feet, and the depth of lots ranges from 174 to 450 feet.

Building restrictions from \$3500 to \$10,000. The extension of the San Vicente Road and the completion of the "Short Line" will bring Brentwood within 20 minutes of Los Angeles by automobile and 25 minutes by car line.

VISIT THE PARK TODAY

Take Santa Monica cars via Sawtelle, marked "Westgate," at Fourth Street Station. 11-cent commutation rate.

MARTIN RECOVERING.

Despite Terrible Injuries and Rough Mountain Wagon Ride, Local Contractor's Condition is Improved.

Austin O. Martin, whose life was almost crushed out in a terrible accident in the mines of the American Cattle Mining Company, American Cattle, about one hundred miles east of Reno, Nev., had been removed to Lane Hospital, San Francisco, where his condition is improving.

Caught by the whirl of a belt attached to mining machinery which he was helping to install, Mr. Martin was pounded around a shaft in a terrific manner before help arrived.

His escape was miraculous, and now his rugged strength has gone much to aid the efforts of the physicians. Mr. Martin was at one time prominent in Southern California athletic circles. He is a member of the firm of Hicker Martin and his partner, Mr. Hicker, is expected home today.

The skin was scraped off a large portion of Martin's body and he was terribly bruised, crushed and mangled, but fortunately all of his vital organs escaped serious injury. No bones above the pelvic region were broken. His right hip and left knee and ankle are dislocated and broken in a manner that will require a most difficult feat of surgery to mend them. At least three, and perhaps five, operations will have to be performed to get all the broken bones and ligaments in place. Through it all, Martin is bearing up bravely and utters no complaint.

The scene of the accident is thirty miles from Lovelock, Nev., the nearest point where surgical aid could be had. Two doctors were summoned from that place, but it was more than twenty-four hours before they arrived. They found the case so difficult that Dr. Rixford, a bone specialist of San Francisco, was telegraphed for. Dr. Rixford arrived there last Thursday and under his direction the patient was transported thirty miles over a rough trail on an improvised litter to the railroad, and then taken in a Pullman berth to the hospital in San Francisco. Mrs. Martin was with him at the time, and has constantly helped to nurse him since the accident. His parents, Dr. and Mrs. Joseph H. Martin of Los Angeles, are also with him. It will be many weeks before he can be brought to his home here.

Handsome New Store.

The new Parmelee-Dohrmann pottery, glassware and lamp store, located at Nos. 484-486 South Broadway, is an illustration of the rapid growth of all branches of business in Los Angeles, and the cosmopolitan character of the retail and wholesale houses.

Residents can remember when the Parmelee-Dohrmann store was a modest country-town affair, but it grew with the city, and now, in its wide-spreading rooms, has as widely divergent a stock as can be found on the Pacific Coast.

The public came to the opening yesterday in large numbers, and the interesting window displays, serving to show the artistic taste of the window dresser, as well as the quality of the goods, were very attractive.

The stock is extremely large, and seems to have been chosen from the best supplies and manufacturing houses in this country and in foreign cities. The interior decoration of the store is tasteful in design and fully in harmony with the stock carried and the general size of the various departments.

FOR SALE AS A WHOLE TRACT FOR SUBDIVISION FROM San Francisco

41 MINUTES San Francisco ONLY \$25,000 CASH REQUIRED

POPULAR QUESTIONS AND EXPERT ANSWERS.

Chemistry. "Gould's Medical Dictionary" gives the following definitions: (1.) Chemistry, the science of the molecular and atomic structure of bodies. (2.) Atom, the ultimate unit of an element. (3.) Atomic heat, the specific heat of an atom multiplied by its atomic weight. (4.) Atomic weight, the weight of an atom as compared with that of an atom of hydrogen. (5.) Molecule, the smallest quantity of a substance that may exist and preserve its characteristic qualities. (6.) Molecular weight, the weight of a molecule of a substance as compared with the weight of a molecule of hydrogen. Let us consider chemistry in another light by presenting some facts in a popular way. Observe the blacksmith's pair of tongs he withdraws a red-hot iron bar from the forge, quickly it glows in the air, and as it cools, it scales off the iron. These scales are black in color and form a crust on the iron. This crust is the oxide of iron, and is formed by the union of iron with the oxygen from the air. Suppose the blacksmith after heating the iron to redness allows the bar to cool in the open air, and around the bar, now weigh the iron and find that its weight is heavier than when it was first heated. This is because the iron has combined with the oxygen from the air, and the oxide of iron has formed a crust on the iron. This crust is the oxide of iron, and is formed by the union of iron with the oxygen from the air. Suppose the blacksmith after heating the iron to redness allows the bar to cool in the open air, and around the bar, now weigh the iron and find that its weight is heavier than when it was first heated. This is because the iron has combined with the oxygen from the air, and the oxide of iron has formed a crust on the iron. This crust is the oxide of iron, and is formed by the union of iron with the oxygen from the air. Suppose the blacksmith after heating the iron to redness allows the bar to cool in the open air, and around the bar, now weigh the iron and find that its weight is heavier than when it was first heated. This is because the iron has combined with the oxygen from the air, and the oxide of iron has formed a crust on the iron. This crust is the oxide of iron, and is formed by the union of iron with the oxygen from the air. Opportune Sale of Kimonos

Kimono weather is due, and soon you will delight in lounging or working around the home in a pretty kimono. They are the most comfortable of all house garments, and are deemed necessities by every woman. It is true they are easily made should you purchase the material, but when you can get the garment ready to put on less than you could purchase the material by the yard, to say nothing of the cost of making or the time required to complete the garments, you will appreciate the savings we offer at this sale. Our new stocks are in. They are the prettiest obtainable and positively the best qualities at the lowest prices to be found anywhere. A number of them are handsome Japanese garments of our own importation, and have no duplicates elsewhere. We can say to you that the sale prices will average one-third less than the regular value.

For \$1.50 Long Lawn Kimonos

98c
An assortment of nearly too dozen; full figure length; hundreds of different colors and patterns; also solid shades of blue, pink, also white. FRANCHISE ENTOMBED.

(Continued From First Page.)

to know, and surely their representatives must have, in order to justify their action, what they are doing, and whom they are doing it for. Rights granted by the public should not be disposed of in secret, and the people at large have a right to be taken into confidence when a matter of such great public importance is under discussion.

ATTORNEY DISBANDED.

In conclusion I desire to say that I cannot ignore the fact that, in the passage of this ordinance, the advice of the city's legal counsel was disregarded; and that, against his protest and plea for delay, the ordinance was put upon its passage without giving the opportunity asked for by him to examine into and report upon its merits or demerits. Certainly it would appear that legal counsel, employed by the city to advise it in matters affecting its powers and duties, should especially be consulted when there is any doubt or question as to the legality of any proposed action. As I understand the position of the City Attorney, as expressed to your honorable body in open session when this ordinance was before it, he took the ground that it was competent for the city to grant this franchise at all, it could only do so by a sale and for value. This advice, one must admit, is a very strange one, and the city is without power to give away its property, or to give away rights therein to private persons. There is, therefore, serious legal question as to the power of your honorable body to pass this ordinance.

This was signed by H. E. Huntington. Councilman Blanchard moved as a substitute motion that the franchise application together with Mr. Huntington-Gilmore franchise was sent to the committee of the whole. Howton seconded this motion. But Councilman Smith objected.

BURIED.

"For God's sake let us die it," he called, "and get rid of it."

"Let us clear the docket by filling this franchise and taking a fresh start."

This was the last of the discussion. Blanchard withdrew his substitute motion and by a unanimous vote the Huntington-Gilmore franchise was sent to the big vault under the City Hall—the vault from which no ordinance ever returns.

FREE Mrs. Rorer's New Cook Book

60 pages of up-to-date ideas in recipes. Shows you how to serve dishes to please the eye as well as the taste.

TALK OR TALCUM?

If you are buying talk then buy anything the dealer may choose to say is "just as good."

If you are buying talcum, then MENNEN'S BOKATED TALCUM is the only preparation which you can buy with satisfaction.

"Talk is cheap," Talcum, however, is not so cheap, because it costs the dealer more and makes his profit less. That's why he'd sooner sell you talk than "talcum" of the Mennen Brand.

Don't be talked out of buying Mennen's BOKATED TALCUM, the only powder which can be used with safety and satisfaction.

Have you tried MENNEN'S VIOLET BOKATED TALCUM TOILET POWDER? It's fragrant with the odor of fresh plucked Parma Violets.

For sale everywhere for 25 cents, or mailed postpaid on receipt of price, by GERHARD MENNEN CO., Newark, N. J.

FATALLY HURT BY LOCOMOTIVE.

DRIVER OF WAGON DIES FROM
FRACTURED SKULL.

Santa Fe Switch Engine at East Seventh Street Demolishes Ray Byers' Vehicle, Throwing Him Out on His Head—Earl Aulsebrook Injured by Auto—Chicagoan Run Down.

Ray Byers, aged 19 years, son of J. W. Byers, a well-known sand and gravel contractor, died late yesterday afternoon in the Receiving Hospital from injuries caused by a locomotive which smashed into the wagon he was driving, and dumped Byers out on his head.

Young Byers was driving across the Santa Fe tracks on East Seventh street, near the river, in the morning, when a switch engine struck his wagon, demolishing it. There was a second wagon hitched behind the one in which Byers was sitting, and in this J. W. Nichols was riding.

Nichols says the engine rushed down upon them without warning. The shock of the impact hurled Byers into the air, and he struck on his head beside the track. His pet dog was on the seat beside him, and he was instantly killed. The horses had crossed the tracks and were not injured. They broke away in their fright and dashed down the street for several blocks before they could be caught. Nichols escaped uninjured.

The injured boy was hurried to the Receiving Hospital, where it was found that he had sustained a severe concussion of the brain and fracture of the skull. Police Surgeon Smith, Chief, Surgeon and Foreman, and Dr. Morrison of the Santa Fe Hospital operated and trepanned the skull in a desperate effort to save the life of young Byers, but the skull was cracked from a point in the middle of the forehead over the top and well down the back of the head. The physicians declared it wonderful that he had not died instantly, considering his injuries. He displayed wonderful vitality, and lived several hours, but his case was hopeless, and he died at 4:35 in the afternoon.

The body was removed to Pierce Bros' morgue, where an inquest will be held tomorrow.

EARL AUSEBROOK HURT BY AUTO.
Earl Aulsebrook, aged 12 years, and son of Chief of Police Walter Aulsebrook, is laid up as a result of being run down by an automobile near the corner of Hope and Pico streets, Sunday morning.

The boy rode the number of the machine as "Cal 423," and the records show that this number was issued to a horse of Oakland. Capt. Broadhead has detailed the automobile squad of the police force to investigate the case, and, if possible, arrest the guilty driver.

Young Aulsebrook says the car was being driven at a high rate of speed, and while he was riding his bicycle the machine approached from behind and was deliberately driven over him. Says the chauffeur speeded up and away as quickly as possible, and did not stop to see what injury had been sustained by him.

Earl will be laid up for several days, and is suffering from painful bruises. Fortunately, no bones were broken.

WAGON INJURES CHICAGOAN.
A Townsend of Chicago was run over by a big automobile shortly after yesterday at First and Broadway. The machine was owned by J. W. Wilson, and his chauffeur was placed under arrest, and will have to face charges of a scorching and battery. Townsend sustained a lacerated hand and numerous bruises. He was treated at the Receiving Hospital.

THE OIL INDUSTRY.
OIL PRODUCERS
SEEK INCREASE.

WANT MORE MONEY, AND MEET TODAY TO RAISE PRICES.

Independent Dealers Will Fight It Out at Bakersfield in Attempt to Force the Associated Oil Company to Make a Better Contract Price Per Barrel.

From all quarters of the State of California, independent oil men, are reaching today the meeting of the delegates of the Independent Oil Producers' Agency, which will begin its session in Bakersfield this morning, for the purpose, primarily, of formulating a new agreement with the Associated Oil Company for the ensuing year. Next importance comes the work of combining the organization of the independent producers in the Los Angeles fields as well as those in the north. It is expected that the action upon the part of all the independent men in the oil fields of the State much result to the industry will be achieved.

The regular delegates for the independent oil producers south of the Tehachapi is C. E. Price of this city, and in addition that he represents a strong group among them who favor organization of business interests as far as possible to uphold the price of oil is concerned. Two meetings of independent oil producers of Los Angeles and the north were held recently in San Francisco, but no line was decided upon. The meeting in Bakersfield will probably last three or four days, and the action will be in a large measure influenced by the producers to join hands.

Meanwhile the fight of the independent oil producers to raise the price of oil to the Associated company from 15 to 20 cents a barrel, while the latter seeks to renew the contract upon the same, or nearly the same, terms as for 1905-06.

A number of local oil men have gathered for Bakersfield to keep in with the important meetings which will be held there this week. Some of them, however, did not reach owing to a cave-in of the tunnels at Tehachapi Mountains. One of the delegates, who was on the Pacific train Sunday night, his ticket and for a berth and for the night. When he woke up yesterday morning he thought he was in a berth, but found he was still in the Arcade Depot. Trains for the oil men began to arrive in Bakersfield yesterday, according to the information to the oil producers who are going to Bakersfield.

Alameda for Honolulu.
The steamer Alameda will make her last trip from San Francisco April 7, and the only one to Hawaii. A more delightful trip is not to be had. The steamer is one of the best in the world, and is now active. Read for the steamer. San Francisco, or 12th and Market st., San Francisco, or 12th and Market st., Los Angeles.

SECOND BIG AUCTION SALE ...Benedict Townsite...

"The Townsite With a Quarter Million Dollars Behind It."

Benedict Townsite is backed by a territory of unlimited resources—it is the logical beginning of a real city—already an important junction point and distributing place for lumber.

We guarantee the establishment of several stores within 90 days, or your money will be refunded. Over \$15,000 worth of high class improvements will be established immediately.

Benedict has fairly leaped into prominence—not a boom town, however—simply the natural product of railroad interests and a productive surrounding territory. Started with a rush by 32 prominent business men and other people LIVING IN ITS VICINITY. Benedict is only 30 minutes from Los Angeles on the Santa Ana electric line—the most important steam and electric railway converging point between these two cities.

Free Spanish Barbecue 50c—Round Trip—50c

\$2000 in lots given away free to people attending the sale whether they buy or not. Terms on auction prices \$25 cash and \$10 per month. Sale commences at 10 a.m. Santa Ana cars leave Sixth and Main streets at 8, 8:30, 8:55 and 9:50 a.m.

EXECUTIONS AROUSE IRISH.
LONDON, April 2.—The announcement of the execution of a Native Irishman was received today with angry cries of "shame" from the Irish Nationalists and the Labor benches and from some Liberals in the House of Commons. One ministerialist amidst cheers and some protests denounced the executions as blood-thirsty murder. James Ramsey MacDonald, secretary to the Labor representative committee, promptly moved an adjournment of the House to discuss the manner in which martial law was being applied to Natal, "to the eminent and great danger to which native

THE CITY IN BRIEF.

CITRUS CROPS ALL RIGHT.

NEWS AND BUSINESS.

County Farm's Golden Crop.

Part of the season's orange crop at the County Farm was sold yesterday for \$100,000. The crop will bring in about \$100,000 this year.

Kubelick Beat Sale.

Jan Kubelick will play again at Simpson Auditorium on Thursday evening. Seats for the concert are on sale this morning at the Birkel music store.

Wiggins' Work Authorized.

The Chamber of Commerce has authorized Frank Wiggins proposed publicity work on the Southern Pacific line, and in the immediate future the arrangement of the exhibit will be begun. The preparation will occupy about a month, and the whole exhibit will probably be installed about the first of June.

Y.M.C.A. Committees.

The business men's committee of 100, the chairman and members of subcommittees in the Young Men's Christian Association building, will meet around the lunch table at Christopher's Broadway restaurant at 12:30 today, to complete the final details for the spring days' work for the fund.

Competitive Drill.

The third annual competitive drill for the silver cup, which will be won by the nation's best drill team, will be held at the Y.M.C.A. on the 15th inst. The uniform ranks of the several orders interested in the event intend to make the date a red letter day in Southern California drill circles. There will be special trains from Pasadena and Los Angeles. The drill is expected to be a hummer.

Two Libraries Open.

The fiction and juvenile departments of the Public Library will continue in the City Hall for a couple days yet, where they will be open to the public; the reference department will be open in the new library in the Laughlin Annex on Wednesday or Thursday. With the exception of the reference department, all are now open to the public in the new quarters.

Indictments Returned.

The federal grand jury has returned true bills against George Bertie Pinney of Redlands, and Wood and Banks, alleged counterfeiters living in Ontario, Ontario, mailed an obscene letter to Sara A. Mulroy of New York. Wood and Banks were recently acquitted on a charge of having counterfeit molds, as the particular one mentioned in the indictment could hardly be claimed as such. A more perfect form of indictment has been drawn up.

Don't Want Illuminations.

Two men are endeavoring to canvass the merchants for subscriptions to place strings of lights along the streets at Fiesta time. The Merchants and Manufacturers Association is discounting this as much as possible, as it believes that our present electricians, an unusual sight to most of the visitors, will be far more impressive when seen as an every-day attraction than gaudy strings of holiday lamps. The M. & M. says the canvassers are asking exorbitant rates for their scheme.

More Mail Carriers Today.

On account of the continued and extraordinary growth of the city mail service, the Postoffice Department has authorized sixteen additional letter carriers, who will enter the service this morning. This makes 155 regular carriers. As the addition will cause a readjustment of the service in all parts of the city, the Postoffice Department has received the number of 243,357. Most of them were finally sent to their destination. The average daily number of callers at the general delivery, exclusive of Sundays, was 4615.

BREVET TIES.

\$2.50 to \$5 spectacles and eyeglasses for only \$1.50. Let us save you money by fitting your eyes with a pair of our best. All crystal reading lenses in a ten-year gold-filled frame for \$1.50; eyes examined by graduate State-registered optician; consultation free. Clark's Optical and Jewelry Store, 215 S. Spring, near Fourth, opposite New Helman building.

The San Francisco office of the Los Angeles Times is in room 411, Chronicle building. Telephone Main 472. Subscriptions and advertisements taken. Visitors will find copies of The Times on file, and are welcome to call and read them.

Great showing of fine oil and water colors in our new display room at retiring-from-business prices. The McClellan-Kennel Co. 111 Pine street, below Main, between 4th and 5th.

A typographical error occurred in Sunday's ad. of the Crescent Furniture company's advertisement. It should have read Granite Rugs only \$1 a square yard.

Dr. Charles Albert Sewall, rectal surgeon, has returned to his old office, 34-36 Douglas building. Ladies' reception room with lady attendant.

Patrons of Hong Yuen Laundry, 227 East Fifth street, please call and identify their goods; driver deceased. Bring tags when possible.

Ladies can make their garments perfect. Rosenbloom's College, 1400 W. 7th. Sale of odds and ends at half price. I. R. Bowers & Sons, 413 S. Main st. Indian blankets, serapes, souvenirs, sale. Field & Coy., 313 S. E. way.

Extraordinary and Sensational

5,000 White Waists

A Full Carload at Sacrifice Prices

A solid carload of shirt waists arrived late Saturday afternoon, which we have hurriedly passed through our receiving department and arranged into six monster bargain assortments for sale this morning.

This huge quantity of waists was purchased nearly two months ago for early selling at a time when manufacturers were eager for orders. Having arrived nearly a month late we have secured another concession in price, making these waists cost us only a small fraction on the dollar.

-LOT 1-

59c

Waists in white, black and colored lawns and ginghams; worth up to \$1.00, for 59c.

-LOT 3-

\$1.00

Waists in white lawn, lace and embroidery trimmed; open front and back; long and elbow sleeves. Values \$1.25, \$1.38 and \$1.50, for \$1.00.

-LOT 5-

\$1.69

Very fine waists; in white lawns, white and colored batistes and chambrays; waists that if bought today we would have to retail at \$2 and up. Special for \$1.69.

-LOT 2-

79c

White lawn waists, elegantly trimmed, open front and back; worth up to \$1.25, for 79c.

-LOT 4-

\$1.45

An elegant assortment, over 150 dozen in 10 different styles; beautifully trimmed. Many worth \$1.75 and \$2.00. Sale price \$1.45.

-LOT 6-

\$1.95

A very choice lot of high-class lawn and batiste waists, beautifully trimmed with fine quality of Val. lace and Swiss embroidery. We do not see their equal anywhere for double what we put them on sale. Special for \$1.95.

Don't Miss the Grand Pre-Easter

No. 1, at \$5 VALUES NEARLY DOUBLE

We consider this one of the most liberal sales of fine millinery that our department has ever been able to arrange. Right at the time when you are ready to select your Easter hat we offer three big special collections. One at \$5, one at \$7.50 and one at \$10. Almost every hat in these assortments is worth double the price asked. The models are all new and they are trimmed with studied care. These are easily the most beautiful hats shown in Los Angeles for the money. Don't miss the chance.

SALE OF TRIMMED HATS

THREE BEAUTIFUL SPECIAL ASSORTMENTS

No. 2, at \$7.50 VALUES NEARLY DOUBLE

We consider this one of the most liberal sales of fine millinery that our department has ever been able to arrange. Right at the time when you are ready to select your Easter hat we offer three big special collections. One at \$5, one at \$7.50 and one at \$10. Almost every hat in these assortments is worth double the price asked. The models are all new and they are trimmed with studied care. These are easily the most beautiful hats shown in Los Angeles for the money. Don't miss the chance.

No. 3, at \$10 VALUES NEARLY DOUBLE

We consider this one of the most liberal sales of fine millinery that our department has ever been able to arrange. Right at the time when you are ready to select your Easter hat we offer three big special collections. One at \$5, one at \$7.50 and one at \$10. Almost every hat in these assortments is worth double the price asked. The models are all new and they are trimmed with studied care. These are easily the most beautiful hats shown in Los Angeles for the money. Don't miss the chance.

makers of artists' materials, deserve the good name they enjoy—their are the best in the world. We are agents and carry a complete stock. Every assistance and help approved by experience are here.

SANBORN, VAIL & CO.

357 SOUTH BROADWAY.

TOP COAT TAILORING TALENT

Have 15 tailors who took a special course in 1906 tailoring under that New York expert that we have been talking about. They are turning out the smartest effects in Top Coats that Los Angeles has seen these days. Most San Francisco garments look like "bags" alongside of these superbly made coats. We have mastered the trick of shaping in the waist and bringing out the lower back seams in just the proper degree to lend a jauntyness to the Top Coat that it has never before possessed.
